

# On Specimens of Eozoon Canadense and Their Geological and Other Relations (Classic Reprint)

John William Dawson

Excerpt from On Specimens of Eozoon Canadense and Their Geological and Other Relations These have been very fully discussed by Sir W. E. Logan, by Dr. T. Sterry Hunt and by the writer, and their conclusions have been confirmed by more recent observations. The oldest known stratified rock in Canada is the massive orthoclase gneiss, designated by Sir William Logan the gneiss of Trembling Mountain, and of unknown thickness. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works.
