

Twelve Lectures on the Structure of the Central Nervous System : For Physicians and Students (Classic Reprint)

Ludwig Edinger

Excerpt from Twelve Lectures on the Structure of the Central Nervous System: For Physicians and Students The wish expressed on many bands that this little work should be adapted to the needs of those who wished to practice under its guidance has been complied with, in that the number of cuts has been increased and the description of individual regions been made more exhaustive. A treatise on the comparative anatomy of the nervous system, based on personal investigation, has been embodied in the work. This addition, which permits us to take a more general morphological View of the macroscopic structures, will also serve as a guide to those who wish to pursue independent courses of study in this most important portion of brain anatomy. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work.
